

AUSTRALIAN BAUXITE LIMITED

ASX: ABZ

ASX ANNOUNCEMENT
12 December 2013

About Australian Bauxite Limited ASX Code ABZ

Australian Bauxite Limited (ABx) holds the core of the newly discovered Eastern Australian Bauxite Province. Its 42 bauxite tenements in Queensland, NSW and Tasmania covering 6,534 km² were rigorously selected on 3 principles:

1. good quality bauxite;
2. proximity to infrastructure connected to export ports; and
3. free of socio-environmental constraints.

All tenements are 100% owned and free of obligations for processing and third-party royalties. ABx has already discovered many bauxite deposits and new discoveries are still being made as knowledge and expertise grows. ABx conducts vigorous reviews of the commercial viability of its projects and tenements, resulting in new acquisitions, but also reductions in area as exploration is conducted.

The company's bauxite is high quality and can be processed into alumina at low temperature – the type that is in short-supply globally. **Global resources declared to date total 115.6 million tonnes.** At the company's first drilling prospect in Inverell, northern NSW, a resource of 38.0 million tonnes¹ has been reported from drilling 35% to 40% of the area prospective for bauxite and a resource of 37.9 million tonnes² of bauxite has been reported at the Taralga project in southern NSW. A 6.0 million tonnes³ maiden resource was declared at Guyra. A 24.5 million tonnes⁴ resource has been declared at the Binjour Plateau in central QLD, confirming that ABx has discovered a significant bauxite deposit including some bauxite of outstandingly high quality. A 5.7 million tonnes⁵ maiden resource has been declared for Tasmania. Australian Bauxite Limited aspires to identify large bauxite resources in the Eastern Australian Bauxite Province, which is emerging as one of the world's best bauxite provinces.

ABx has the potential to create significant bauxite developments in three states - Queensland, New South Wales and Tasmania. Its bauxite deposits are favourably located for direct shipping of bauxite to both local and export customers.

ABx endorses best practices on agricultural land, strives to leave land and environment better than we find it. We only operate where welcomed.

Capital Raising Completed

Australian Bauxite Limited (ABx) (ASX: ABZ) advises that it has completed a placement of 5.4 million fully paid ordinary shares at \$0.21 cents per share to sophisticated, eligible and/or professional investors, as defined under Section 708 of the Corporations Act (**Placement**).

\$1,134,000 of additional capital was raised to progress the Company's trial mining, mine establishment and development programs, and to provide working capital.

State One Stockbroking Ltd and Gleneagle Securities facilitated the placement, which was well supported by existing shareholders.

Settlement of the placement is scheduled to occur on 17 December 2013 and quotation of the new shares is expected to commence on that date.

The shares are to be issued under ABx's 15% placement capacity as provided for under Listing Rule 7.1.

ABx's CEO, Ian Levy, commented; "Despite the recent difficult share market conditions, it has been most encouraging to see Australian Bauxite maintaining market support, especially from key supportive shareholders. We now have 1,600 shareholders, our share liquidity is high and we are in good shape for the crucial year ahead.

"In mid January 2014, the global bauxite market will change in a positive way for ABx as Indonesian export bans and increased export taxes start taking effect. Our business plan has always been to capitalise on this once-only opportunity to become the world's new supplier of gibbsite-rich bauxite."

There are now 120.2 million shares on issue representing a market capitalisation of \$27.6 million (at 9 December 2013)
